

NEW Safety Hoist Solar Panel Cradle

According to the Solar Energy Industries Association (SEIA)/GTM Research U.S. Solar Market Insight™ 2016 report, solar photovoltaic capacity is predicted to triple in the U.S. in the next 5 years and installation of solar PV capacity will reach more than 18 billion watts annually by 2022. You need the new Safety Hoist solar panel cradle to keep up with demand and respond to industry changes.

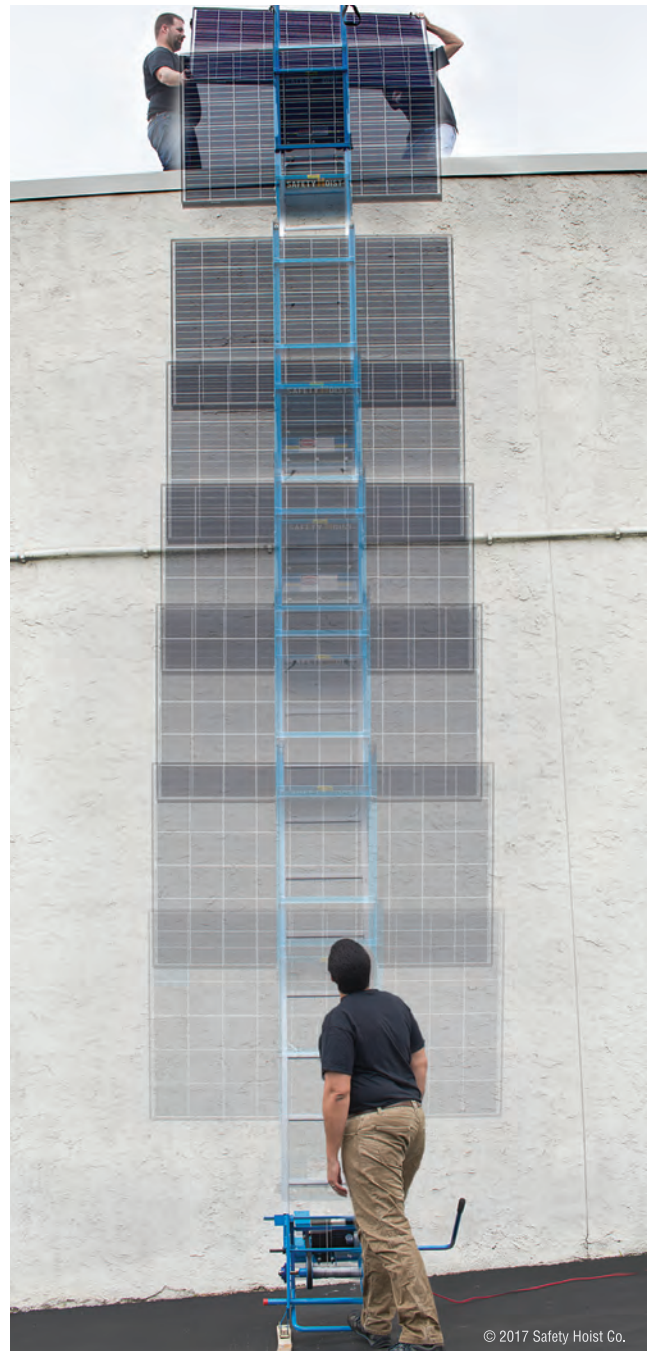

Safety Hoist Company has been an industry leader for 50 years. Our new solar panel cradle is the latest example of our commitment to developing better material handling alternatives for the industry.

Our brand new design still

- Conveys solar panels to the rooftop
- Mounts on any existing Safety Hoist
- Remains safer and significantly more operator-friendly than other solar panel carriages/carriers
- Is made in the U.S.A.

See for yourself—it

- Unloads solar panels to the roof easier than other brands and models because of the innovative design
- Moves 1 to 3 solar panels at a time
- Safeguards the solar panels with all-steel construction and protective rubber stripping
- Securely holds solar panels with the nylon cam straps included with the solar panel cradle
