Make your Safety Hoist even more of a workhorse with these attachments

Unloading ramp—automatically unload away from the edge of the roof for increased safety and efficiency

Support brace—easily stabilize your Safety Hoist for higher elevations

Multi-purpose carrier—effortlessly lift unwieldy plywood and rolled goods from ground to roof

Newly designed flat panel/solar panel cradle—securely convey solar panels and other materials to the rooftop

Replacement parts for the MH-123 are still available.

See how our material hoists outperform the alternatives!

Which material hoist is best for you?

You have simple, safe, affordable models to choose from including the NEW electric hoist.
SAFETY HOIST co.

Safety Hoist Products

- Safe
- Simple
- Affordable
- Responsive to the needs of the roofing and building industries
- OSHA-compliant
- Guaranteed quality and a 1-year warranty
- Made in the U.S.A.
- Come with outstanding service—including same-day shipping on parts

Safety Hoist is committed to safety and innovation. For over 50 years, our focus has been designing and manufacturing better material handling alternatives.

The alternatives

- Manually carrying heavy materials
  *May result in injury and/or serious violation of OSHA regulations*

- Renting or owning and operating a boom truck
  *Always expensive and likely to cause property damage, not always available when needed, may not place material where it is needed*

- Renting a roofing conveyor belt
  *Can be expensive to rent and hard to locate, requires special training and substantial space to operate, may cause property damage*
NEW Electric Hoist

- 250 lb. capacity material hoist (EH-250)
- 500 lb. capacity material hoist (EH-500)

- Environmentally-friendly electric hoist can be used indoors and outdoors
- Pendant control with 16 ft. cord allows operator to stand safe distance from load
- Both electro-magnetic and mechanical brakes
- Controlled descent of load
- Made with fewer parts for easy assembly (least number of parts of any Safety Hoist)

- Extremely portable thanks to steel frame on wheels
- Lightweight aluminum track sections
- Easy to set up
- No special tools required for assembly
- Sections bolt together
- One-person operation
- 28 ft. length standard, maximum 44 ft.
- 4 ft. and 8 ft. extensions
- Uses 110V AC power supply
- Self-lubricating platform wheels (EH-500 only)
- Solid steel carriage wheels with ball bearings
- Self-storing multi-purpose carrier included
- Additional attachments available
- Easy to maintain or repair on-site

Rugged construction

- 200 lb. capacity material hoist

- Rugged all-steel construction

- Portable
- Lightweight aluminum track sections
- Easy to set up
- No special tools required for assembly
- Sections bolt together
- One-person operation
- 26.5 ft. length standard, maximum 42.5 ft.
- 4 ft. and 8 ft. extensions
- Briggs & Stratton gas engine (Honda optional)
- 100% ball bearing winch
- Externally mounted bearings can be greased
- Adjustable motor base
- Solid steel carriage wheels with ball bearings
- Mechanism for locking carriage in place for transit
- Self-storing multi-purpose carrier included
- Additional attachments available
- Easy to maintain or repair on-site
- Self-energizing semi-metallic brake
Newly designed peak for strength

- 300 lb. capacity material hoist
  - Made with fewer parts for easy assembly
  - Rugged all-steel construction
  - New peak for greater stability and strength
  - Portable
  - Lightweight aluminum track sections
  - Easy to set up
  - No special tools required for assembly
  - Sections bolt together
  - One-person operation
  - 26.5 ft. length standard, maximum 42.5 ft.
  - 4 ft. and 8 ft. extensions
  - Briggs & Stratton gas engine (Honda optional)
  - 100% ball bearing winch
  - Externally mounted bearings can be greased
  - Adjustable motor base
  - Solid steel carriage wheels with ball bearings
  - Mechanism for locking carriage in place for transit
  - Self-storing multi-purpose carrier included
  - Additional attachments available
  - Easy to maintain or repair on-site
  - Self-energizing semi-metallic brake

Higher capacity for larger jobs

- 400 lb. capacity material hoist
  - Single-handle design simplifies operation
  - Extremely portable thanks to steel base on wheels
  - Heavy-duty aluminum track sections
  - Easy to set up
  - No special tools required for assembly
  - Sections bolt together
  - One-person operation
  - 28 ft. length standard, maximum 44 ft.
  - 4 ft. and 8 ft. extensions
  - Briggs & Stratton gas engine (Honda optional)
  - 100% ball bearing winch
  - Self-lubricating platform wheels
  - Solid steel carriage wheels with ball bearings
  - Self-storing multi-purpose carrier included
  - Additional attachments available
  - Easy to maintain or repair on-site
  - Self-energizing semi-metallic brake
